# Global <br> The Random Walk <br> Mapping the World's Prices 2013 

Last year we had published the first edition of "Mapping the World's Prices" and, given the overwhelmingly positive response from readers, we have decided to publish an update and hope to do so every year. Just like the previous edition, this is a simple survey of prices and price indices of a wide array of goods and services from around the world. The data is either gleaned directly from prices posted on the internet or from sources that have collated data. In order to ensure that that prices are comparable across countries we have tried to use products that are standard across countries or have close substitutes.

We are aware of the limitations of surveying prices over the internet as well as the distortions caused by discounts and other temporary variations. We faced an additional problem this year because we also attempted to make the survey comparable with last year's data. Changes in product design and upgrades can often make this difficult. Thus, we have tried to correct for these distortions where possible and readers can refer to the notes accompanying the tables. Despite these issues, we feel that the survey provides the reader with a reasonably unbiased view of global prices.
This year's survey too found that Australia and Japan are very expensive across a wide range of products while the United States is generally the cheapest developed country. For a developing country, Brazil too was found to be very expensive. However, exchange rate movements did impact the cross-country comparisons this year. So, Japan appears to have somewhat reduced its price gap with the rest of the world compared to last year. A weaker currency has also made Britain and Brazil a bit more affordable in dollar terms. Broadly speaking, India remains the cheapest major economy in the world with a weaker exchange rate compensating for higher inflation (except for a few items like fuel). China is still cheaper than most of the world but the gap appears to be gradually narrowing.
The data also showed many of the idiosyncrasies of prices at each location. Hong Kong is exorbitantly expensive if you want to rent office space but cheap if you want to buy a Big Mac or a Starbuck's coffee. Singapore is a cheap place to get an MBA but not if you want a car or a pair of Levi's jeans. Indian cities are usually cheap but pizzas cost the same as in New York. Sao Paulo and Moscow are the most expensive developing country cities in our survey with prices often exceeding those in developed countries, but they are cheap for cigarettes.

We re-computed our three indices: "The Weekend Getaway Index", "The Cheap Date Index" and "The Graduate Recruitment Index". Sydney remains the most expensive place for a weekend holiday at almost double the cost of doing the same in New York. Moscow and Sao Paulo too are very expensive. Indian cities like Mumbai and Delhi are the cheapest but Kuala Lumpur is just as affordable. Tokyo was the real surprise with a weekend getaway now costing only $75 \%$ of New York.

Mumbai, Delhi and Johannesburg are the cheapest place for going on a movie-and-pizza date while Australian cities are the most expensive. Even if Sao Paulo is costly for a weekend getaway, it is affordable for a movie date. Singapore and Berlin too are quite reasonably priced. Mexico City is the cheapest major city in the world to hire and deploy a MBA graduate. Berlin and Singapore also seem attractive for deploying a graduate. Indeed, they are not just cheaper than major global financial centers like New York and Hong Kong but even compared to Mumbai.

| Prices are sourced from http://www.pintprice.com. This website collates user feeds on price of beer in various parts of the world. While different beer brands are popular in different parts of the world, we have tried to stick to standard brands to the extent possible. For example, while Japan's most popular beer brand is Asahi Super Dry, we have quoted price of Guinness or Kilkenny, since Asahi Super Dry is not a standard beer across other countries. These are not supermarket prices but prices of beer available in an average bar or restaurant. Apart from inflation itself, some stark changes in prices may be due to change in the preferred brand of beer in a locality and/or change in averages due to certain skewness in user feeds. |  |  |  |

NOTE:
Prices are minimum fares for single rides. Most cities have their version of tube rails or mono rails. Authorities often combine tickets for these with tickets for bus rides, e.g. Oyster passes in London or Charlie cards in Boston. In cities which do not have any form of intra city rail transport system, we have taken equivalent fares for bus rides. Fares are sourced mainly from websites of surface transport authorities of transport system, we have taken equivalent fares for bus rides. Fares are sourced mainly from websites
respective cities. Some of the rates have also been taken from user fed websites like www.priceoftravel.com.

| 09. India | Mumbai | $6,571.24$ | $64 \%$ |
| 10. United States | New York City | $10,210.58$ | $100 \%$ |
| 11. France | Paris | $10,903.88$ | $107 \%$ |
| 12. United States | San Francisco | $10,927.31$ | $107 \%$ |
| 13. Singapore | Singapore | $6,097.49$ | $60 \%$ |
| 14. Australia | Sydney | $9,193.67$ | $90 \%$ |

Source: This index measures the monthly cost of deploying an MBA recruit in a typical corporate set-up and is defined as follows: monthly salary of the recruit, provision of a $6 \times 6$ foot office cubicle in the CBD, mobile phone and laptop, phone calls and health insurance. The costs of mobile phone and laptop have been assumed to be amortized over 12 months. For Mumbai, we have assumed the recruit to be a graduate from IIM Ahmedabad. For US, we have assumed the recruit to be a graduate from Harvard Business School.

## NOTE:

Health insurance annual premium is for a basic policy for a local resident between 25-35 years. Since the definition of a standard package varies between countries, we have tried to stick to an insurance policy which covers inpatient events and no extra covers like dental, etc. We recognize that we are not comparing a standard product across countries and, therefore, have refrained from publishing this in the main
section. Note, however, that this data was used in the Graduate Recruit Index. The data has been sourced mainly from local providers of heath section. Note, however, that this data was used in the Graduate Recruit Index. The data has been sourced mainly from local providers of heath insurances, reports of organizations engaged in research of health care and news clippings

## Important Disclosures

## Additional information available upon request

For disclosures pertaining to recommendations or estimates made on securities other than the primary subject of this research, please see the most recently published company report or visit our global disclosure look-up page on our website at http://gm.db.com/ger/disclosure/DisclosureDirectory.eqsr

## Analyst Certification

The views expressed in this report accurately reflect the personal views of the undersigned lead analyst(s). In addition, the undersigned lead analyst(s) has not and will not receive any compensation for providing a specific recommendation or view in this report. Sanjeev Sanyal

## Regulatory Disclosures

## 1. Important Additional Conflict Disclosures

Aside from within this report, important conflict disclosures can also be found at https://gm.db.com/equities under the "Disclosures Lookup" and "Legal" tabs. Investors are strongly encouraged to review this information before investing.

## 2. Short-Term Trade Ideas

Deutsche Bank equity research analysts sometimes have shorter-term trade ideas (known as SOLAR ideas) that are consistent or inconsistent with Deutsche Bank's existing longer term ratings. These trade ideas can be found at the SOLAR link at http://gm.db.com.

## 3. Country-Specific Disclosures

Australia and New Zealand: This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act and New Zealand Financial Advisors Act respectively.
Brazil: The views expressed above accurately reflect personal views of the authors about the subject company(ies) and its(their) securities, including in relation to Deutsche Bank. The compensation of the equity research analyst(s) is indirectly affected by revenues deriving from the business and financial transactions of Deutsche Bank. In cases where at least one Brazil based analyst (identified by a phone number starting with +55 country code) has taken part in the preparation of this research report, the Brazil based analyst whose name appears first assumes primary responsibility for its content from a Brazilian regulatory perspective and for its compliance with CVM Instruction \# 483.
EU countries: Disclosures relating to our obligations under MiFiD can be found at http://www.globalmarkets.db.com/riskdisclosures.
Japan: Disclosures under the Financial Instruments and Exchange Law: Company name - Deutsche Securities Inc. Registration number - Registered as a financial instruments dealer by the Head of the Kanto Local Finance Bureau (Kinsho) No. 117. Member of associations: JSDA, Type II Financial Instruments Firms Association, The Financial Futures Association of Japan, Japan Investment Advisers Association. This report is not meant to solicit the purchase of specific financial instruments or related services. We may charge commissions and fees for certain categories of investment advice, products and services. Recommended investment strategies, products and services carry the risk of losses to principal and other losses as a result of changes in market and/or economic trends, and/or fluctuations in market value. Before deciding on the purchase of financial products and/or services, customers should carefully read the relevant disclosures, prospectuses and other documentation. "Moody's", "Standard \& Poor's", and "Fitch" mentioned in this report are not registered credit rating agencies in Japan unless "Japan" or "Nippon" is specifically designated in the name of the entity.
Malaysia: Deutsche Bank AG and/or its affiliate(s) may maintain positions in the securities referred to herein and may from time to time offer those securities for purchase or may have an interest to purchase such securities. Deutsche Bank may engage in transactions in a manner inconsistent with the views discussed herein.
Russia: This information, interpretation and opinions submitted herein are not in the context of, and do not constitute, any appraisal or evaluation activity requiring a license in the Russian Federation.

## Risks to Fixed Income Positions

Macroeconomic fluctuations often account for most of the risks associated with exposures to instruments that promise to pay fixed or variable interest rates. For an investor that is long fixed rate instruments (thus receiving these cash flows), increases in interest rates naturally lift the discount factors applied to the expected cash flows and thus cause a loss. The longer the maturity of a certain cash flow and the higher the move in the discount factor, the higher will be the loss. Upside surprises in inflation, fiscal funding needs, and FX depreciation rates are among the most common adverse macroeconomic shocks to receivers. But counterparty exposure, issuer creditworthiness, client segmentation, regulation (including changes in assets holding limits for different types of investors), changes in tax policies, currency convertibility (which may constrain currency conversion, repatriation of profits and/or the liquidation of positions), and settlement issues related to local clearing houses are also important risk factors to be considered. The sensitivity of fixed income instruments to macroeconomic shocks may be mitigated by indexing the contracted cash flows to inflation, to FX depreciation, or to specified interest rates - these are common in emerging markets. It is important to note that the index fixings may -- by construction -- lag or mis-measure the actual move in the underlying variables they are intended to track. The choice of the proper fixing (or metric) is particularly important in swaps markets, where floating coupon rates (i.e., coupons indexed to a typically short-dated interest rate reference index) are exchanged for fixed coupons. It is also important to acknowledge that funding in a currency that differs from the currency in which the coupons to be received are denominated carries FX risk. Naturally, options on swaps (swaptions) also bear the risks typical to options in addition to the risks related to rates movements.

## Global Disclaimer

The information and opinions in this report were prepared by Deutsche Bank AG or one of its affiliates (collectively "Deutsche Bank"). The information herein is believed to be reliable and has been obtained from public sources believed to be reliable. Deutsche Bank makes no representation as to the accuracy or completeness of such information.

Deutsche Bank may engage in securities transactions, on a proprietary basis or otherwise, in a manner inconsistent with the view taken in this research report. In addition, others within Deutsche Bank, including strategists and sales staff, may take a view that is inconsistent with that taken in this research report.
Opinions, estimates and projections in this report constitute the current judgement of the author as of the date of this report. They do not necessarily reflect the opinions of Deutsche Bank and are subject to change without notice. Deutsche Bank has no obligation to update, modify or amend this report or to otherwise notify a recipient thereof in the event that any opinion, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Prices and availability of financial instruments are subject to change without notice. This report is provided for informational purposes only. It is not an offer or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Target prices are inherently imprecise and a product of the analyst judgement. As a result of Deutsche Bank's March 2010 recommendations may differ and the price targets and estimates of each may vary widely. The financial instruments discussed in this report may not be suitable for all investors and investors must make their own informed investment decisions. Stock transactions can lead to losses as a result of price fluctuations and other factors. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the investment. Past performance is not necessarily indicative of future results. Deutsche Bank may with respect to securities covered by this report, sell to or buy from customers on a principal basis, and consider this report in deciding to trade on a proprietary basis.
Derivative transactions involve numerous risks including, among others, market, counterparty default and illiquidity risk. The appropriateness or otherwise of these products for use by investors is dependent on the investors' own circumstances including their tax position, their regulatory environment and the nature of their other assets and liabilities and as such investors should take expert legal and financial advice befor entering into any transaction similar to or inspired by the contents of this publication. Trading in options involves risk and is not suitable for all investors. Prior to buying or selling an option investors must review the "Characteristics and Risks of Standardized Options," at http://www.theocc.com/components/docs/riskstoc.pdf. If you are unable to access the website please contact Deutsche Bank AG at +1 (212) 250-7994, for a copy of this important document.
The risk of loss in futures trading, foreign or domestic, can be substantial. As a result of the high degree of leverage obtainable in futures trading, losses may be incurred that are greater than the amount of funds initially deposited
Unless governing law provides otherwise, all transactions should be executed through the Deutsche Bank entity in the investor's home jurisdiction. In the U.S. this report is approved and/or distributed by Deutsche Bank Securities Inc., a member of the NYSE, the NASD, NFA and SIPC. In Germany this report is approved and/or communicated by Deutsche Bank AG Frankfurt authorized by the BaFin. In the United Kingdom this report is approved and/or communicated by Deutsche Bank AG London, a member of the London Stock Exchange and regulated by the Financial Services Authority for the conduct of investment business in the UK Singapore Branch or BaFin. This report is distributed in Hong Kong by Deutsche Bank AG, Hong Kong Branch, in Korea by Deutsche Securities Korea Co. This report is distributed in Singapore by Deutsche Bank AG, Branch in respect of any matters arising from, or in connection with, this report. Where this report is issued or promulgated in Singapore to a person who is not an accredited investor, expert investor or institutional investor (as defined in the applicable Singapore laws and regulations), Deutsche Bank AG, Singapore Branch or Deutsche Securities Asia Limited, Singapore Branch accepts legal responsibility to such person for the contents of this report. In Japan this report is approved and/or distributed by Deutsche Securities Inc. The information contained in this report does not constitute the provision of investment advice. In Australia, retal clients should obtain a copy of a Product Disclosure Statement (PDS) relating to any financial product referred to in this report and consider the PDS before making any decision about whether to acquire the product. Deutsche Bank AG Johannesburg is incorporated in the Federal Republic of Germany (Branch Register Number in South Africa: 1998/003298/10). Additional information relative to securities, other financial products or issuers discussed in this report is available upon request. This report may not be reproduced, distributed or published by any person for any purpose without Deutsche Bank's prior written consent. Please cite source when quoting.
